So, I got this product after seeing it in a GenCon add and figured why not. I own soem of the other Kobold Guides to World Building and etc so I knew the style of a bunch of different artciles from different people. At first I was just going to go to the artciles that interested me most but then I just fell into reading each one from front to back, SO WELL DONE! The book tackles playing Evil Characters, how to put weirdness in your games (Think Horror or Lovecraft Weird), Complex plotting, Doing cliffhangers, and much more. The advice each person gives is super solid and really

can fit into any type of RPG game that you would want to run (not just Heroic Fantasy). Keep up the great work Kobold Press!

This is a good book full of sort essays by luminaries in the role-playing game industry. They give tips and perspectives about all facets of running a game, My favorite section is by Richard Pett where he takes time to talk about making memorable NPCs. He provides two d50 tables and a sample of how he uses this.

Wouldn't it be great if you could sit down and pick the brain of some truly great and experienced GMs and game designers and learn how to improve your own GM sessions, whether you're doing prepared modules or homebrewed designs? Well, essentially, that's what you get with this Kobold Guide. Like others in the series, it's collection of essays that cover various topics. The downside to this format is that not everything will be related to what you're interested in. For instance, I ended up highlighting probably half of Kevin Kulp's "Oral Tradition" essay given how many useful tidbits it provided, while other essays weren't nearly as useful. Still, I suspect there's more than enough in this book to make it worth it for GMs of all levels of experience, and the advice is going to apply to any rule system that you happen to play.
