Customer Reviews

PROS: 1. Decent topic-by-topic review guides 2. Clearly written/thought-out answer guides CONS: 1. WAY too easy. Whereas one of the other SAT II prep guides might ask an equilibrium question that requires an ICE table (with variables or with actual calculations) the Kaplan version is more likely to ask a question on writing an equilibrium constant (and looking at just things like products over reactants or not including solids and liquids, BASIC stuff...) 2. Practice scores don't line up with actual scores. Because the questions are too easy, that means that your practice score on the Kaplan tests ends up being like 60-80 points higher than on other practice tests (or the actual

tests!!!). That's a real problem!!!

Excellent.

Very good

great
